

July 11, 2017

To FCC Commissioners:

As a small business owner and consumer, I am very concerned about the proposed changes to net neutrality. My business depends on people being able to find me through a general search. I cannot afford to pay to be placed higher in a search engine or for ISPs to use discriminatory financial practices to put me at a distinct disadvantage. Eliminating net neutrality is bad for small business, bad for consumers and bad for rural America. It will further erode the urban/rural divide and will increase economic disparity. Please protect net neutrality.

Sincerely,

Clark Wiegman
